

MirroCraft

These are just some of the detailed construction items that make up the exclusive *MirroCraft* difference!

HEAVY DUTY FIBERGLASS CONSOLES!

MirroCraft's fiberglass consoles, which are made in house, are "better looking, more straight" than competitors. Also, they will not fade color and feature stainless gauge bezels with brushed pewter looks and accented gauge panels.

ROCK SOLID TRANSOM KNEE BRACES

The absolute strongest in the industry. Not only is it the strongest, they also have more supports than their competition!

NEW MirroTrack!

New select MirroCraft models feature the "Mirro" Track Gunwale Rail System. This allows you to add accessories to your gunwale, keeping a nice clean rigging on your new fishing machine!

10 INCH RIB SPACING

The 10" rib spacing that is used during manufacturing at MirroCraft leads to more strength in the hull compared to all the other boats on the market. More strength equals a tougher boat, especially in rough water! In addition, the hull is double riveted to the transom for added strength on 17' models and up!

ROTO-MOLDED SEATS

Roto-molded upholstered fishing seats have sculpted side bolsters and plenty of support for hours of comfort on the water!

SPRAY IN LINER

MirroCraft boats have a spray in liner which quiets the hull, eliminates mildew and offers a durable storage area!

LIMITED LIFE-TIME WARRANTY

MirroCraft boats are covered by a Limited Lifetime Warranty. Lifetime coverage extends to the hull, and plywood floor. Not all manufacturers have this!

INJECTED FOAM FLOORING

Once the floor is installed, MirroCraft injects the foam underneath the flooring. This creates added strength and eliminates any gaps that can be missed. The result contributes to their famous quiet ride on the water, even on rough days!

SEAMLESS LIVEWELLS

The live wells are seamless roto-molded, which offer leak free performance, optimally placed aerators, and ease of draining and cleaning.

BUILT IN THE USA

Independently owned & Wisconsin built since 1956. It makes a difference when the employees still care!

PERFORMANCE

"Integrated Performance Tabs" enhance out-of-the-hole and top end performance. Available on all models from Sportsman through the Aggressor EXP!

GAUGE THICKNESS

Compare the MirroCraft Boat lineup to all the rest of the competitors on the market, and you will find that they are typically built heavier!

MirroCraft

BUILDING THE FINEST ALUMINUM BOATS SINCE 1956

There's no questioning the fact MirroCraft boats are built with the highest quality, along with industry changing technology.
